

Valued clients:

I am set up to do telemedicine IME's. I just completed a webinar with Chris Brigham, M.D. and other experts. It is easy for the claimant if they have a smart phone or a laptop. Given the current situation with the COVID-19 pandemic, this is a reasonable alternative. I am starting this practice immediately.

The platform is secure and HIPAA compliant for privacy. We will be going to complete virtual practice beginning now. The only requirement for the claimant is to have a smartphone or laptop with camera. I can send the claimant an email or text invite. They will click on the link and will be asked to enable the camera.

This is the text message link the claimant will see:

The email invite is as follows:

Telemedicine meeting invitation

The following is the page they will see after clicking the link:

I will be ramping up a website with an online questionnaire in the near future to make this easier. We are working to become paperless and already have that capacity to receive records via PDF. Future meical records can be sent securely with a password or with a secure link.

We will be in contact with adjusters and attorneys to let them know of this immediate transition.

This is unfortunately the new reality for the near term but is better than claims becoming stagnant.

This is an evolving situation. If you have questions please email me at the address below. Or text at the cell number below.

Stay safe and healthy. Stay home and socially distance yourselves. We will survive this but we all must be diligent.

Sincerely,

JSE

John Sterling Endicott, M.D., M.P.H.
